How Europe Underdeveloped Africa

Synopsis

Before a bomb ended his life in the summer of 1980, Walter Rodney had created a powerful legacy. This pivotal work, *How Europe Underdeveloped Africa*, had already brought a new perspective to the question of underdevelopment in Africa. His Marxist analysis went far beyond the heretofore accepted approach in the study of Third World underdevelopment. *How Europe Underdeveloped Africa* is an excellent introductory study for the student who wishes to better understand the dynamics of Africa's contemporary relations with the West.

The late Guyanese writer, Walter Rodney had left us his great insights regarding the reasons for the underdevelopment of the African continent. His work finds equal footing with those of Frantz Fanon and to an extent that of the late Brazilian author and social activist, Paulo Freire in attempting to provide a critical insight, and a gainful analysis to the situation and reasons for the poverty on the African continent. This analysis, whether one agrees with its conclusions or not provides a means towards looking at the stark realities of African underdevelopment. Rodney thesis that the trans-atlantic slave trade diminished the African manpower to attain development cannot be easily pushed under the carpet. Development is how a people within the means available to them, within their eco-context utilize their knowledge for the good of the totality. When their people is afflicted with disease or mass uprooting there is bound to be both a biological and social ripple effects that would affect both the pace and nature of development. It is here that we realize that Rodney's proposition

underlines a crucial factor in explaining the reasons for the African state. The comparative examples used from various societies within Africa and beyond to support forcefully and assertively his theoretical claim shows a well researched critical mind at work. The book relates that the reality of underdevelopment can only be tied to two events, namely European colonialism and the capitalist orgy for profit, through the use of cheap labor (slavery) and through capitalist exploitation of the labor through the marketing and importation of African cash crop resources to Europe and the New World.
