A little backgroundI used the paper based Franklin Planner about a decade ago and did a career shift to where I was using company software for all my contact work along with an appointment calendar. B/c of that - I scrapped the Planner and used a palm pilot for all my phone numbers. At the time - I had taken the full day live course for a few hundred bucks and found it invaluable in understanding "how to" use the nuts and bolts of priorities / daily lists / sharpen saw features / etc. Things changed professionally for me - and I wanted to revisit the Planner to see if it would be

valuable to me again today. I purchased some filler pages for my old planner binder and tried to get back in the swing of things and see if the Planner would be useful to me now. I didn't want to spend the money on "the live course" again - but wanted to get refreshed. I read a few Covey books I had in my personal library - but they were more or less conceptual and didn't really go through the use of his planner beyond generalities. I found out that this new and updated program might fill in the gaps and the price was right so I tried it.***** I AM VERY HAPPY AUDIO PROGRAM *****. So far, I've listened to the first 3 disks and they are pretty much a recording of a live trainer giving their seminars. It does a very thorough job of walking you through the areas of evaluating and writing your guiding principles / how to effectively plan weekly and daily with a system like this / how to select and prioritize tasks for each day (things like don't ever schedule more than 65 % of your day in daily tasks) - as well as documenting and note retrieval.
