Customer Reviews

Before writing this review, I spent some time looking over many of the other reviews on here. The spread is interesting, and I think it comes from a misunderstanding of the very limited scope of this book. First off, if you're looking for a book to explain the innate differences (if there are any?) between men and women, this is definitely not it. Further, if you're looking for a book that dives deep into communication theory and has profound statements regarding the nature of good communication, this is equally lacking. The title betrays the purpose. This book is a badly written collection of common sense ideas and tactics to use when communicating in a relationship. Why 4 stars? Because common sense is not as common as people think. I am amazed at the 1-star ratings by "intellectuals" who charge that this book stands on very shaky philosophic ground, and that it does not live up to the high caliber of true scientific studies into communication fundamentals and/or gender differences. Get a grip! That's not the purpose of the book! This book is equivalent to

an "Idiot's Guide to Listening, Respect, and Communication, with Easy-to-Remember Examples." Intellectuals charging that the common person should read XYZ's scientific study about the fundamentals is missing the basic point -- I don't want to know the fundamentals of communication (at the moment), I just want to know why my last girlfriend got offended when I offered solutions when she was complaining about work. Sounds simple? Not for all of us. I have a degree in rocket engineering and I am very confident that I could tear a book about "Physics for the common person" to ribbons for making vast over-generalizations and ignoring (what I consider to be) key details in the trade.

Finally after 12 years and fourteen worldwide very successful million copies, MEN ARE FROM MARS, WOMEN ARE FROM VENUS comes out across the USA in the more affordable paperback. Rather than the typical "I liked it, but" format, my experience with the book was that I wound it liking it more and more as it went on, but the introductory chapters almost stopped me flat. In school we were warned not to write in "Glittering Generalities," yet Gray does his best to make a virtue of that. Who but a stand-up comedian would dare say "Canadians love Good Government, Americans love Liberty"? Or: "Californians crave B vitamins, Midwesterners crave protein"? Gray's whole thesis sounds just as simplistic at first. (In general, and with exceptions), Men are from Mars: Competitive, individualistic, not into "caring and sharing," wanting to be admired for their ability to hang tough and deliver the goods yet unwilling to communicate the fact they need admiration. And Women are from Venus: Craving respect from their men, looking for emotional bells and whistles and not so much material status symbols as their men might suppose, prone to cycles of emotional fatigue and dependent on their mates to cherish them. In the beginning it all sounded so like a 1950s Tupperware Party I almost gave up. But I didn't, and eventually the book works, in no small part because Gray writes patiently and simply but not simplistically, supported by a huge pool of real-life examples from his own therapy sessions (and apparently lots of "plugs" from earlier editions of his books at its successors). It's hard to argue with people who tell you their marriage was saved by this book.
