The Pimsleur Method We make no secret of what makes this powerful method work so well. Paul Pimsleur spent his career researching and perfecting the precise elements anyone can use to learn a language quickly and easily. Here are a few of his "secrets":

- **The Principle of Anticipation** In the nanosecond between a cue and your response, your brain has to work to come up with the right word. Having to do this boosts retention, and cements the word in your mind.
- **Core Vocabulary** Words, phrases, and sentences are selected for their usefulness in everyday conversation. We don't overwhelm you with too much, but steadily increase your ability with every lesson.
- **Graduated Interval Recall** Reminders of new words and structures come up at the exact interval for maximum retention and storage into your long-term memory.
- **Organic Learning** You work on multiple aspects of the language simultaneously. We integrate grammar, vocabulary, rhythm, melody, and intonation into every lesson, which allows you to experience the language as a living, expressive form of human culture.
- **Learning in Context** Research has shown that learning

new words in context dramatically accelerates your ability to remember. Every scene in every Pimsleur lesson is set inside a conversation between two people. There are no drills, and no memorization necessary for success. Active Participation The Pimsleur Method + active learner participation = success. This method works with every language and every learner who follows it. You gain the power to recall and use what you know, and to add new words easily, exactly as you do in English. The Armenian (Western) Language Armenian (Western) is the dialect most often encountered among Armenians outside of Armenia. It is spoken by the majority of Armenians living throughout the Middle East, North and South America, Europe, Africa, and Australia, collectively called the Armenian Diaspora. Tech Talk - CDs are formatted for playing in all CD players, including car players, and users can copy files for use in iTunes or Windows Media Player.

I ordered this so my husband and I could learn a little Armenian (I am of Armenian descent). I have other Armenian language tools, such as the VocabuLearn cassettes, a textbook, and Samuelian's transliteration dictionary, and they are all helpful in their own way, but in terms of amount of progress for time spent, Pimsleur beats them all. If you have ever listened to the Pimsleur compact programs for other languages, you will be familiar with the structure. I have listened to the first lesson of two other languages, and the Western Armenian one is no different. They start out by teaching you how to ask someone if she understands Armenian (or whatever language the tapes are for), and by the end of the first lesson, you can understand and participate in a brief

conversation that centers around that. Each subsequent lesson builds on that first lesson, teaching you more words and phrases. The lessons are in both English and Armenian, just as an FYI. This is not done in an immersion method. The way that Pimsleur handles pronunciation is also very helpful, especially for individuals who are not used to hearing Armenian. Some of the words are very long, and can sound very confusing. Pimsleur walks you through the pronunciation of each word, starting with the final syllable and working backwards. My husband, who has pretty crappy pronunciation (since he didn't learn how to make the "gh" and "kh" sounds), has been doing surprisingly well with this method. I still have to help him out, but overall, it is as good as can be expected without an actual person telling you what you are doing wrong, although the lessons do usually address common mistakes. Pimsleur also sneaks in grammar lessons, so you gradually figure out some of the grammar constructs.
