# Times Tables The Fun Way: Book For Kids: A Picture Method Of Learning The Multiplication Facts

## Synopsis

Memorization of the multiplication facts is fun and easy with this colorful and clever book of cartoons and stories. Children learn to associate the numbers with the characters in the story. To teach 4x4, the story tells about Bart who loves to go hang gliding and can't wait until he turns 16 so he can get his driver's license and drive his 4 by 4. Children easily remember once the story is learned. The caption below the story says: Remember: you have to be 16 to drive a 4x4. There are cartoons and stories for all the difficult facts, ie. the 3's, 4's, 6's, 7's, and 8's. Tricks are used to teach the easier ones ie. 1's, 2's, 5's, and 9's. Kids love the stories and will never forget "You have to be 16 to drive a 4 by 4, (4x4). Over 500,000 copies have been sold to schools in the US since 1992.

## Book Information

Spiral-bound: 88 pages

Publisher: City Creek Press; 3rd Revised edition (April 1999)

Language: English

ISBN-10: 1883841437

ISBN-13: 978-1883841430

Product Dimensions: 0.5 x 7.2 x 8.5 inches

Shipping Weight: 12.8 ounces (View shipping rates and policies)

Average Customer Review: 4.2 out of 5 stars [See all reviews](#) (267 customer reviews)

Best Sellers Rank: #13,851 in Books (See Top 100 in Books) #88 in [Books > Children's Books > Education & Reference > Math](#)

## Customer Reviews

I've now done this book with 3 kids (a boy and 2 girls), and it's so easy and, yes, FUN. One girl was here visiting and picked it up because of the colorful cover and asked me to go through the book with her. She's a 5th-grade ESL student struggling in math. She was blown away at how easy this was and surprised herself at how well it helped her remember her facts. Even my 5yodd (who is also attracted to the colorful pictures and stories) remembers some of the facts. All the pages are sturdy un-bendable, water-resistant extremely heavy cardstock. It comes as a spiral-bound book so that you can bend it back and show the big picture (trigger) on one page while you read the (short) story to them from the facing page. Each section has a little memory review and there is a pre/post test at the end to measure your progress. Also, as I stated before, the book is very colorful and fun to look at, so kids can't help picking it up and flipping through it. The student book is really the only thing you need (there are other bells and whistles, but they're not necessary) and well worth the

price. Kids can read through this on their own and at their own pace. Whether they're learning all the facts from the beginning or brushing up on just a few that they just cannot seem to remember, this book can do it. A table of contents at the beginning tell them exactly what page to turn to to learn which fact. It is SSOOOO important that kids learn their facts cold before going into higher maths. Standardized tests are timed and they cannot get bogged down and side-tracked with what the answer to  $7 \times 8$  is. I wish something like this was available when I was a kid.
